1. The following is an examiner's statement of reasons for allowance:
2. Applicants show a slow release pharmaceutical composition comprised of porous particles wherein the particles comprise an active agent in a core and a coating on said core. The prior art shows coated particulate compositions for delivering active agents. Masterson et al US 5,580,580, considered the closest prior art of record shows a formulation comprised of solid sugar/starch seeds coated with a binder solution of drug and further coated with a polymer membrane. The prior art does not show nor fairly suggest applicants' core comprised of a homogeneous mixture of active agent and a polymer insoluble in gastric and intestinal juice wherein the core is further coated with a polymer insoluble in gastric and intestinal resulting in a functionally and structurally distinct coated core particles having internal porosity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,

should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

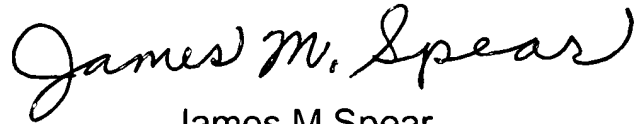

Claims 1-21 are rejected.
